

# e232

## More scientists per millimetre

More features per millimetre and tri-band functionality make this stylish little mobile your perfect companion, anywhere in the world.

Whether for business or pleasure, the features of the e232, such as its sophisticated camera, high resolution colour screen, MMS messaging and voice memos mean it's never been easier to seize the moment, view it clearly and then send it to your friends or colleagues, along with a voice attachment. No matter where you are.

And the integrated camera light doubles as a flashlight. Perfect for when you've lost the remote down the back of the couch.

- Sophisticated built-in camera
- Camera / Utility light
- Tri-band, go-anywhere functionality (GSM 900, 1800, 1900)
- Large, high definition, 65,000 colour display
- Always-on wireless internet (WAP)
- Voice dialling and memo recording
- MMS messaging.

### **High Definition Colour**

The large, crystal clear 65,000 colour display of the e232 is perfect for taking pictures, viewing images, composing messages or browsing the internet.

### **What's on the menu?**

The e232 has a simple, easy to navigate menu which is made even clearer by the vivid colour screen. The e232 also has short-cut keys for many common phone tasks, saving you more time for living.

### **Your life in pictures**

No matter what you're up to, the e232's built-in camera can capture it. With a camera light for night time shooting, a variety of shoot environment settings, consecutive shoot mode and a self-timer, you can image your life, indoors and outdoors, day or night.

Then use MMS messaging to send the action on to friends.

### **Mobile Internet**

Put information and entertainment at your fingertips with the e232's WAP functionality. Quick access to what you want, whenever you want it: news, sport, entertainment or business information. Or download images, animations and ring tones to suit your phone to your style
